

DoCoMo Communications Laboratories Europe GmbH

NTT DoCoMo is a world leading mobile communications company with more than 44 million customers. DoCoMo Euro-Labs (www.docomoeurolabs.de) is a NTT DoCoMo affiliated research laboratory focusing on next generation mobile communications.

We are looking for a

Student Assistant (Werkstudent) – Mobile Applications, Semantic Web and User Interaction –

Job description: DoCoMo Euro-Labs is looking for a highly motivated student interested in an internship in a research project exploring ways to support mobile users in their everyday decision making. The student will be required to develop original software for tag-based applications exploiting NFC/RFID, 2D bar codes and visual tag. For more information see <http://www.hcilab.org/projects/perci/>. During the internship the student will gain experience on Java and J2ME programming, XML and Web services programming as well as User Interface Design. Depending on the development of the project and the length of the internship, the student may also gain experience on semantic web modeling and inference, and with web 2.0 applications.

Skills: Fluency in English (required), Java and J2ME (desirable).

Commencement: Fall/Winter 2007

Working hours: Flexible

Salary: By arrangement
