READING ASSIGNMENT: Introduction to trust and reputation (systems)

We will discuss the following questions to the reading assignment 1 in the next session (Fr, April 27th).

- What is the main contribution of the paper?
- What is decision trust and reliability trust? What is their definition of trust?
- Which basic principles for computing reputation do they identify?
- What’s trust transitivity?
- What’s the difference between distributed and centralized reputation systems?

- What is the main contribution of the paper?
- What’s the relationship between trust, risk and reputation?
- Which dimensions do Hendrikx, Bubendorfer, and Chard propose for classifying reputation systems? What do they mean?
